PROFILE SUMMARY

Final-year Informatics Engineering student with experience in web development, database management, software testing, data validation, and operational workflow. Currently developing web-based systems using JavaScript, React, Node.js, Express, and MySQL. Experienced in hospital blood bank data operations and freelance web/mobile application testing. Interested in digital transformation, manufacturing digitalization, internal tools development, process improvement, and software quality.

EDUCATION

Universitas Indraprasta PGRI | *Bachelor of Informatics Engineering - Final Year Student* | *Expected Graduation: 2026*

Relevant focus: Web Development, Database, Information Systems, Software Testing, Data Processing

WORK EXPERIENCE

Data Entry Staff - Hospital Blood Bank / UPD RS Dharmais | *Jakarta, Indonesia* | *2023 - present*

- Handled blood request data, billing, and blood product records accurately in daily hospital operations.
- Checked data consistency, request details, and documentation to reduce input errors.
- Supported operational workflow related to blood stock, request validation, and FIFO process.
- Worked with sensitive hospital data and followed accuracy, confidentiality, and documentation standards.

FREELANCE TESTING EXPERIENCE

Web & Mobile Application Tester - Upwork Project | *Remote*

- Tested website and mobile application features based on user flow and functional requirements.
- Checked login flow, form input, navigation, buttons, UI behavior, and overall usability.
- Reported bugs, UI issues, and functional problems clearly for improvement.
- Gained practical experience in manual testing, functional testing, and bug reporting.

PROJECT EXPERIENCE

SIMODAR - Mobile Blood Donation Unit Management System | *React, JavaScript, Node.js, Express, MySQL*

- Designed a web-based workflow for mobile blood donation request management, scheduling, officers, and activity reports.
- Developed frontend and backend flow with API connection between client and server.
- Created database structure and tested form input, table display, API response, and data flow.

PRESENZA - Outsourcing Attendance System | *Next.js, TypeScript, Tailwind CSS, Node.js, MySQL*

- Designed role-based attendance flow for HR admin, supervisor, and field workers.
- Planned features such as check-in/check-out, shift schedule, GPS validation, selfie attendance, leave request, overtime, and monthly reports.
- Focused on operational workflow, validation, reporting, and fraud prevention.

TECHNICAL SKILLS

Web Development: HTML, CSS, JavaScript, React, Next.js, Tailwind CSS	Backend & API: Node.js, Express, REST API, Basic PHP
Database: MySQL, SQLite, SQL Query, phpMyAdmin	Tools: GitHub, VS Code, Postman, Excel, Laragon
Testing: Manual Testing, Functional Testing, API Testing, UI Testing, Bug Reporting	Additional: Basic understanding of Laravel, Python, and Data Visualization

STRENGTHS & AVAILABILITY

Strengths: Detail-oriented, able to understand business process flow, familiar with frontend/backend/database/API basics, interested in process digitalization and automation, willing to learn and work with cross-functional teams. **Language:** Indonesian native; English basic to intermediate. **Availability:** Available for internship opportunity and open to discuss working arrangement, schedule, and start date.
